

ANKUR SCIENTIFIC - WEBSITE BANNER CONTENT

Energy from Waste -

Accelerated energy extraction for enhanced global performance

Biomass Wood Waste -

Putting wasted wood to use, with advanced engineering for recycling and energy extraction technology

Biomass Cotton Waste -

Enabling agricultural and industrial waste from cotton processes to use, with advanced engineering for recycling and energy extraction technology

Faecal Waste -

Elevating utility of faecal waste with advanced recycling and energy extraction technology

Municipal Solid Waste -

Empowering urban lives by optimizing municipal solid waste with advanced recycling and energy extraction technology

Municipal Solid Waste -

Empowering urban lives by optimizing municipal solid waste with advanced recycling and energy extraction technology

Chicken Litter -

Utilizing poultry waste for better possibilities with advanced recycling and energy extraction technology

Empty Fruit Bunches -

Exploring possibilities of enhanced utilization of fruit bunches with advanced recycling and energy extraction technology

Pulp & Paper Waste -

Upgrading the waste from natural cellulose with advanced recycling and energy extraction technology

Vegetable & APMC Waste -

Enabling greener use of wasted vegetation with advanced recycling and energy extraction technology
